Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20 and 61-75, drawn to a method of making a biosensor, classified in class 29, subclass 825.
- II. Claims 21-48 and 76-100, drawn to a method of making a biosensor, classified in class 29, subclass 825.
- III. Claims 49-60, drawn to a method of making a biosensor, classified in class 29, subclass 825.

The inventions are distinct, each from the other because:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions The Group I invention has different feature sizes; the Group II invention uses a lens and a mask for the ablation step and the Group III invention requires that a predetermined portion of metal remain after the ablation step.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the searches required for the Groups are divergent, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
